

www.gunnebolifting.com

The best of both worlds.

At Gunnebo Lifting we don't think that our customers should have to choose between a well fitting master link and a safe, well balanced lift. That is why we have created the master link hybrid - MFH. It fits perfectly on the crane hook, centres the load automatically and has generous space for connecting different types of lifting components. We offer the best of both worlds and you get a safe lift without unnecessary wear.

Master Link Hybrid

The Best of Both Worlds

Perfect fit

The upper part of the master link has a larger radius, ensuring a perfect fit on the crane hook. This means less wear and tear, both on the crane hook and the master link.

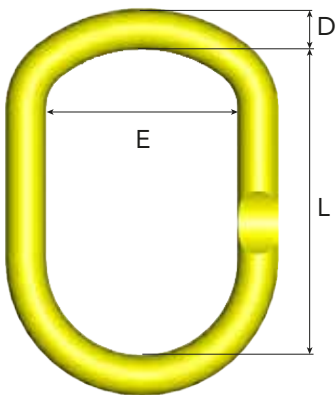

Perfect balance

The shape of the lower half of the master link will automatically centre the load, increasing the safety in every lift.

Generous space

Parallel legs provide generous space for connecting multiple legs to the master link, making assembly easier.

Art. no.	Master link	WLL tonnes	For chain size, mm			D	L	E	For crane hooks	Weight kgs
			1-leg	2-leg	3-4 leg					
Z101262	MFH-1310-10	7.5	13	10	8	22	230	125	≤ 12	1.9
Z101263	MFH-1613-10	10	16	13	10	28	250	135	≤ 12	3.2
Z101264	MFH-2016-10	17	20	16	13	32	280	135	≤ 16	4.6
Z101265	MFH-2220-10	28		20	16	40	320	175	≤ 25	8.6
Z101266	MFHW-2220-10	25		20	16	40	355	225	≤ 50	9.9
